

TRASHEDWORLD BULLETIN 03

Bulletin03 - Fame and growth for TrashedWorld!!!

Hello dear colleagues! Welcome to bulletin number 3 for TrashedWorld. It's been a busy few months and we have some great news to report to you all! Keith Kelly (April 05th 2017)

ELTons -

We're overjoyed to be able to announce that TrashedWorld has been nominated as a finalist at the ELTons Awards!

There are five other finalists in our category - 'Innovation in learner resources' and they all look really great! Keep your fingers crossed please for us on June 14th! :)

UNESCO Week -

TrashedWorld participated in the UNESCO Conference on education for sustainability in Ottawa where we ran an exhibition and a workshop. We managed to sign up over a hundred delegates from all over the world; we made partnerships with other projects like GK4D and associated TrashedWorld with the UN Global Goals and we managed to give UNESCO Director General Irina Bokova a copy of our book.

Education for Sustainable Development Goals -

The 17 goals identified by the UN literally to transform our world have many links to education. We linked TrashedWorld with relevant goals, for example SDG 4 - Quality Education, get your students investigating the world around them and sharing that with global partners; 12 - Sustainable Consumption and Production, raise your students' awareness to the issues using TrashedWorld.

New Module: Oceans and Seas -

We met colleagues working on projects protecting regional seas including the Baltic Sea, the Mediterranean Sea and the Black Sea and we will work on producing a new module for TrashedWorld which focuses on keeping trash out of our oceans and seas. Towards this end, TrashedWorld will run a workshop at the BETA National Conference held in Varna, Bulgaria in June 2017 where we will draft this module with the help of participants. Watch this space!

Appeals for help! -

We need help to develop units and activities which develop skills for change. This means we want you to help us with ideas for getting students work on solutions to waste where the ideas and the solutions come from the students themselves, they identify AND solve the problems.

Do send us your news and, I repeat, your students' work please! Best regards,
Keith
